Our solutions can help achieve the following outcomes:

- Populations have validated and regularly updated information about the COVID-19 vaccine, its safety, and its availability.
- Health workers are trained on vaccine delivery and community sensitization.
- Vaccine recipients are registered and scheduled, compliance is ensured.

The number of approved COVID-19 vaccines is growing and Governments in developing countries are collaborating with development partners to prepare the national vaccine rollouts. Viamo is ready to support these efforts. Our mobile solutions can be launched quickly and scaled nationally to respond to the biggest communication challenges around the vaccine, including limited reach of existing information campaigns and language diversity within communities. The 3-2-1 Service has become a vital tool in combating the COVID-19 pandemic. In 2020, 6.8 million people across the world called the Service to learn more about how the coronavirus spreads and how to keep themselves and their communities safe, listening to nearly 70 million key pieces of information about COVID-19.

Let Viamo help your organization with the following solutions for vaccination campaigns:

- 3-2-1 National Information Service & Vaccine Eligibility Checker
- Targeted Mass COVID-19 Vaccine Messaging Campaigns
- COVID-19 Vaccine Support Call Center
- Social Media Chatbot Campaign
- National polling and surveys via mobile
- Remote Training for health workers or community outreach personnel
- Mobile-based referrals, data collection, and patient reminders

Our Solutions
Viamo’s platform reaches people where they are, with the technology they have. Our solutions are created for even the most basic mobile phones, enabling you to increase your reach and impact.

Our Experience

In Rwanda with Grameen Foundation, a curriculum of audio lessons was sent to approximately 1,600 health workers to strengthen preparedness for Ebola vaccine campaigns and epidemic response.

With UNICEF and Ministry of Health in Pakistan, Viamo helped conduct a mobile-based measles immunization awareness campaign reaching a nearly 18 million people in hard to access areas.

In the DRC, Viamo worked with Grameen Foundation to send Ebola vaccination reminders to over 10,000 recipients as part of the Tujokouwe campaign.
